K&E PLASTICS - We fabricate parts, not promises.

You found it! Advanced custom plastics CNC machining technology combined with experienced, expert machinists. K&E Plastics has 50+ years of machining expertise built into every plastic part or component we make. As your single-source contract manufacturer for custom machined plastic parts, K&E Plastics will make your plastics production efficient and easy. K&E Plastics' extensive machine inventory and team of industry-leading machinists delivers businesses — *from multinational conglomerates to individual inventors* — reliable products at unrivaled quality.

CORE COMPETENCIES

Precision Machined Plastic Parts

MATERIALS

K&E Plastics machines the full gamut of thermoplastics and thermosets including but not limited to:

- Glass Laminates
- Phenolics
- Fiberglass
- Polyester
- Ultem
- Nylon
- Teflon
- PEEK
- Delrin
- Acrylic
- ABS

EQUIPMENT

28 state-of-the-art HAAS CNC machines

- Milling
- Turning
- Routing
- Bending
- Sawing
- Inserts
- Stamping
- Screw threads
- Surface treatment
- Kitting
- Annealing
- Pad printing

PAST PERFORMANCE

K&E Plastics is pleased to have customer relationships that span decades as well to our newest customers. K&E Plastics succeeds when our customers succeed.

- United Technologies
- General Electric
- Global Foundries
- BAE Systems
- Tesla
- General Dynamics
- Lockheed Martin
- Mack Molding
- Parker Hannifin
- Philips Medical

DIFFERENTIATORS

- Standard shop tolerances +/- 0.003"
- Precision shop tolerance +/- 0.0005" to +/- 0.001"
- Rapid prototyping
- Specialize in glass filled laminates
- Extensive dust collection system
- ISO 9001:2015
- ITAR
- HUBzone Certified
- Made in USA
- Customers from coast to coast
- Reverse engineering
- Blanket purchase orders
- Innovative workforce development initiatives
